PREFACE

Zambia in Figures- 2018 features statistical information on various themes pertaining to Social, Economic and Agriculture statistics. Data in this publication are current as of their publishing date or in some cases-projected date. It is a statistical abstract providing summary official statistics on a broad range of conditions and activities in Zambia. Dissemination of statistics remains the centre stage and a fundamental part of all our survey processes during which products are made available in a format appropriate for users.

Therefore, priority is given to ensuring that this publication is easy to read and understand in order to foster communication of statistics. It is my hope that the publication size, format and above all-contents make it easy to use for quick reference purposes.

The official statistics in this publication may be used freely and this publication quoted as the source. Sources of the specific data in this publication are available in various platforms and at CSO offices. Visit us on our website **(www.zamstats.gov.zm)** and data portal **(http://zambia.zambia.opendataforafrica.org)** for more details and all your other data needs.

I would like to thank all our esteemed data users for their interest in statistics and valuable feedback.

Goodson Sinyenga

Acting Director of Census and Statistics
